

Accelerate Your Business Growth

SMB VAM (Video+Audio+Mobility) Solution

Communication Matters in Your Business

Whether being able to have effective communication with your customers, business partners, or colleagues, using the right tool at the right time creates a big difference for your business.

NEC's SMB VAM solution is a way to overcome communication challenges faced by small and medium businesses(SMB). Redefining today's communication can accelerate your business transformation in various scenes.

Communication Challenges Faced by SMB Today

Employees are bounded to their PC and desk phone

Stress of missing important calls while being away from the office

Work often interrupted by handling office phone calls

Employees are using personal numbers to contact clients

Concern of security risks using free apps for business communication

Remote work requires handling office calls regardless of employee's location

Solution Benefits and Values to Your Business

Work Anywhere

You can answer both internal and external office calls with your mobile phone. Video is also available for internal calls

- Less missed calls while away from the office
- Connect remote workers to work as a team anywhere in the world

Work Hands-Free

Be free from corded phones to improve work efficiency with NEC's ST500

- Less work interruption
- Efficient conversation while handling work
- Improve the accuracy of communication with video images

BYOD with Security

Achieve BYOD security by separating personal and business calls

- Avoid non-business apps with uncertain security risks
- Conversation with enterprise grade level connectivity
- Reduce communication expense
